ELECTRON BEAM MELTED MOLYBDENUM PREMIUM GRADE FOR THIN FILM APPLICATIONS

Product Description

High-purity premium quality Molybdenum as-cast material. The material is melted from pure molybdenum by electron beam melting and brought into its final shape by machining.

Applications

The material is used in thin film technology for functional coatings and interfaces.

Microstructure

The material can be offered in as-cast and forged condition (deformation structure) as well as partially or completely recrystallized (depending on the annealing process). Finished products according to customer drawings or raw products as semi-finished products can be delivered.

Ultrasonic Test

All melted and forged molybdenum rods are inspected by ultrasonic test according to DIN EN 583.

Density

$\rho \geq 10.1$ g/cm³ (both melted and forged)
